objacobs@ncsu.edu • (+1) 206.683.2414

RESEARCH INTERESTS

Interested primarily in spatial and Bayesian statistics, as well as stochastic processes and hidden Markov models. These interests are motivated by applications to environmental statistics, ecological statistics and linguistics.

EDUCATION

Ph.D., Statistics *North Carolina State University* 2024 - 2029

Advised by Dr. Erin Schliep

B.S., Mathematics *University of Washington* 2020 - 2024

Minor in French Language, Sociolinguistics, and Translation

ACADEMIC AND RESEARCH EXPERIENCE

Northwest Undergraduate Mathematics Symposium 2023 - Oregon State University | *Presenter* Nov. 2023

- Presented on results found from research on the structure of balanced measures

Washington eXperimental Mathematics Lab - UW Seattle | *Undergraduate Researcher* Sep 2023 - Apr 2024

- Worked with group of 4 others to further understand the structure of balanced measures

Random Number Generation | *Undergraduate Class Research Project* April - June 2023

- Together with 2 classmates, researched cryptographically secure Pseudorandom Number Generation

Washington Directed Reading Program - UW Seattle | *Undergraduate Researcher* Dec 2021 - Feb 2022

- Independent study of Combinatorial Topology and Morse Theory on finite graphs, guided by graduate student advisor.

INDUSTRY EXPERIENCE

JMP | *Graduate Research Assistant* Aug 2025 -

- Statistical software development, focused on the Fit Curve platform

RWE Clean Energy | *Asset Management Intern* Jun - Aug 2023

- Created new data analysis tools for Asset Management team

PUBLICATIONS

G. Baimetov, R. Bushling, A. Goh, R. Guo, **O. Jacobs**, S. Lee (2025). A Decomposition Theorem for Balanced Measures, *Discrete Mathematics*, 348(5)

HONORS & ACCOLADES

North Carolina State University | *Cox Fellow* 2024 - 2025

UW Seattle | *Dean's List* 2020 - 2024

West Seattle High School Alumni Association | *WSHS Alumni Scholarship, Jim Finnie Scholarship* 2020 - 2024

Alki Masonic Lodge | *Outstanding Student of the Year* 2019

- Awarded in recognition of academic performance and community contributions.

RELEVANT COURSEWORK

Statistics | *Statistical Theory, Statistical Models, Probability and Measure Theory, Bayesian Statistics and Computing, Spatial Statistics, Stochastic Processes*

Mathematics | *Real Analysis, Measure Theory, Modern Algebra, Linear Algebra and Optimization, Combinatorial Theory, Topology and Differential Geometry, Differential Equations, Mathematical Cryptography*

Computer Programming | *R, C++, Python, SAS, JSL, MATLAB, Wolfram Mathematica*
